## Claims:

We claim:

- 1. A header and permeate collection means incorporating potted bollow fibre membranes, the header and permeate collection means having,
  - a) a solid mass of a potting material having a first face;
  - b) a plurality of hollow fibre membranes sealed in the potting material; and,
- c) terminal portions of the hollow fibre membranes adjacent open ends of the membranes protruding from the first face,

characterized in that,

- d) the solid mass of potting material extends to and adhesively secures to the inner periphery of a permeate collection means to form a permeate collection zone; and,
- e) the open-ended terminal portions of the hollow fibre membranes protrude into the permeate collection zone.
  - 2. The header of claim 1 wherein the solid mass of potting material extends to and adhesively secures to the inner periphery of a permeate pan, an end cap or a header enclosure to form the permeate collection zone.
- 20 3. The header of claim 1 having a cushioning lamina embedding said fibres and coextensively adhered to said potting material.
  - 4. The header of claim 3 wherein said cushioning lamina has a hardness in the range from Shore A 30 to Shore D 45.
